The explosion of Internet and e-commerce has opened up numerous opportunities for all types of businesses.

Technology creates connectivity with the external world at large, which eventually helps in the growth and development of business. One doesn't necessarily have to remain confined within the four wall boundaries of his room.

More than 90% of all businesses with a marketing department used social media as part of their marketing platform.

You can use social media to connect with a larger audience in order to get national exposure for your brand and products.

Business attire may seem stuffy and old-fashioned in the 21st century, but this look is virtually essential. If you wish to be treated as a professional, you need to be wearing smart business attire.

Wearing business suit will instantly put clients at ease. You'll make them feel comfortable and assured that you know what you're doing, and you will inspire confidence, which can only benefit you in the long run.

This should help your workers perform better. I have read that those who dress professionally are more productive.

Any working parent knows child care is an economic issue. The ability to find and pay for good daycare has a big influence on how many children parents decide to have. To bring more women into the workforce, the government should help provide child care. Raising women's employment rate would boost consumer spending.

10.스포츠를 승리를 위해 하는가, 재미를 위해 하는가

I view sport in a much bigger context, one that goes well beyond who wins and who loses. I play to enjoy myself. Some people take this the wrong way, but winning is not what I base everything on. When you participate in sports you release endorphins which help decrease depression and increase energy.

Sports also promote bonding between players. Sports help to develop and nurture friendships, which may be kept for life. There's nothing better than finding people who share your interests and you just click with immediately.
